Care, Cleaning & Maintenance Guidelines:

Kindly follow the guidelines mentioned below to give you the best results and to maintain the finishes and longevity of the product:

- **Clean the product** with water-soaked soft towel or bathing soap solution once in a day or two to keep the plated surface clean and free from any deposits.
- Don't use any type of **cleaning/detergent agents** which contain acids or chemicals such as flush cleaner, tile cleaner etc.
- Don't use salt or **vinegar-based cleaning agents** to remove scale or scale-related stains. They may damage the surface or finish of products. You need to protect your product from:
 1. **Water Scaling:** Due to presence of minerals and salt in water, scaling is formed on the product if it is not cleaned regularly. The products should be cleaned gently at regular intervals. Also, take extra care to clean the edges and corners of the products because these areas are more vulnerable for scale settling. Clean the aerators from time to time for a perfect foam flow of water from the fittings. The property of water being used is very important for your plumbing installations (Pipes etc.), as well as for your own hygiene. The hardness of water should not exceed 300-400ppm.
 2. **Acid Fumes:** When we clean the tiles or floors in the bathroom with cleaning agents which contain acids or chemicals, acid fumes are formed. Because the basic material used in the products is brass, brass being an alloy of copper reacts with these acid fumes. With this reaction, a green colour layer is formed on the products resulting in damage to the outer finish or coating.
 3. **Scratching while cleaning:** Scratching or scrubbing occurs due to hard nature of cloth or coarse cleaning powder being used for cleaning. Use a gentle fluffy soft cloth for cleaning the surface.
 4. **Atmospheric conditions:** This condition applies mostly to salt content in the air in coastal areas, sometime the air reacts with brass and black spots emerge on the surface of product. Therefore, the product is required to be cleaned regularly. At the time of installation of these products, cover the products with the cloth covers provided in packaging or with polythene till the time you actually start using them.

Care and cleaning guidelines for Sanitary Ware Products:-

Vitreous china sanitary ware products are fragile in nature and need to be handled with care (to avoid personal injury) at all times during its storage, handling, and installation and use thereafter.

- The wash basin and water closet are **heavy** and it is recommended that two persons hold it while it is being fixed.
- Carefully inspect the new product for **damage before installation**.
- **Risk of product damage.** Over tightening may cause breakage or chipping of vitreous china.
- **Risk of external leakage.** Do not lift or rock the bowl after placement.
- Always **test product cleaning solution** on an inconspicuous area on the product before applying it to the entire surface.
- **Do not allow cleaners** to sit or soak on the product.
- Use a soft, dampened sponge or cloth to clean. **Never use abrasive material** like a bristle brush or scouring pad.
- **Wipe surfaces** clean and rinse completely with water immediately after applying cleaners.

Warranty Void:

- Any defect or damage caused to the product due to **natural wear and tear**;
- Any defect or damage arising from reasons attributable to the purchaser/ third party, including without limitation willful actions, negligence, mishandling, improper storage, improper fitting, misuse or improper repair, faulty installation, negligence, accidents and repairs by unauthorized person or maintenance practices and/or used in any manner contrary to any written instructions provided by Jaaz; however the certificate entitles the customer to seek training for his plumber from Jaaz Customer Care.
- Any other defect or damage occurring or being notified after the expiry of Warranty Period, including but not limited to any **latent defect**.
- The problems arising from **inadequate water pressure, water impurities or improper care and cleaning and Voltage fluctuations**.
- In line water filters, should be used with faucets so that any damage to ceramic cartridges without the use of in line filters will void warranty.
- Intentional and **Accidental use of cleaners** containing abrasive cleansers, ammonia, bleach, hair dye, acids, waxes, alcohol, solvents, bath oil, bath salts or other products not recommended for Color and Coating and due to Improper cleaning or cleaning with coarse cloth also for fading of any material due to sun or chemical exposure
- Any goods which after delivery hereunder have been **repaired or modified or altered by anyone other than** that has been **authorized and approved by the Jaaz**.
- This warranty **does not cover installation** or any other labor charges associated with the job work or reinstallation of Jaaz products.
- When the product is not operated in accordance with the instructions concerning use and operating.
- **Damage to any products based on or resulting from installation or repair**, misuse or abuse or alteration or adjustment, whether performance by a contractor, service company or yourself.
- **Damage resulting** from **failing to reasonably clean, care for or maintain** a product.
- This warranty **does not cover the damages as a result of disaster** such as fire or acts of God, including flooding, earthquake, or electric storms and other Force Measure
